MY.GOV.GE PRESENTATION TOUR STARTS IN NUKRIANI COMMUNITY CENTER

Data Exchange Agency of the Ministry of Justice of Georgia has stated presentation tours explaining advantages of MY.GOV.GE to the customers from various regions of Georgia. A number of community centers located throughout Georgia will host MY.GOV.GE presentation events in coming months.

The first location selected for the event was Nukriani Community center in Sighnagi Municipality, which also features newly renovated library. Representatives of Data Exchange Agency have given out a very detailed information about Citizen's Portal MY.GOV.GE for the local audience and presented a clear instructions on how to register and use the portal and receive benefit from it.

In order to register on citizen's portal MY.GOV.GE, one can use a new ID card, or username and password, which can be obtained in Public Service Halls (one time visit is required). However, to take advantage of all services provided by citizen's portal it is recommended to use a new ID card.

Citizen's portal MY.GOV.GE is an online resource, which gathers various e-services provided by public and private organizations. The citizen portal gives user a chance to apply those services remotely, in online regime with a few simple combinations from any country, without having to leave an office or residence (Continued on P. 2)

(Continued from P. 1)

By going through several simple procedures, the user will be able to use diverse services related with the person (passport, different types of certificates, interesting information about surnames and etc.), property, social services, health, business startup, communal payments, fines, or other types of payments. Each service is grouped in relevant category, which makes it easier to choose the needed ones. The user of citizen's portal can also put all frequently used services in his or her personal page. At this moment citizen's portal displays over 70 e-services.

"The portal is designed for every citizen of our country. That is why it is very important to provide comprehensive information about the system for our customer from different regions of Georgia. We strive to make e-governance, one of the examples of which is e-services and their availability, easily accessible for as many citizens as possible. In this regard, it is important to inform customers residing in regions about these services and today's presentation is the first try to fulfill this commitment." – **Irakli Gvenetadze**, DEA Chairman.

The meetings will continue and cover all regions of Georgia.

PSDA WORKS ON THE CREATION OF A SYSTEM OF DIPLOMATIC CARDS

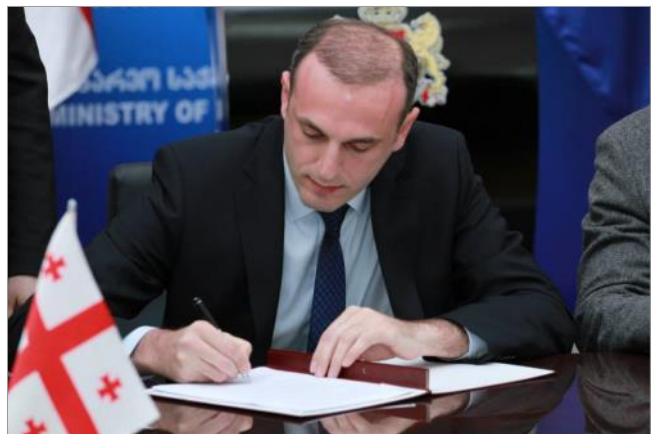

The Ministry of Foreign Affairs of Georgia and PSDA (Public Service Development Agency of the Ministry of Justice of Georgia) have signed Memorandum of Collaboration. According to the memorandum, PSDA takes responsibility to create and empower special electronic program, which will regulate accreditation procedures and data protection issues for the representatives of foreign mission stationed in Georgia.

It worth noting that the Ministry of Foreign Affairs of Georgia is set to be the first organization in the country,

which establishes electronic system for accreditation of diplomats and Georgia is one of the first countries in the world to utilize such system.

Along with formation of related data bases, special Diplomatic Cards and the system of their issuance will be created within the scope of the project. The above mentioned cards with the ability of being integrated into electronic systems will feature special means of protection against fraud and streamline the process of identification of diplomats and granting various benefits intended for them.

INFORMATION TECHNOLOGY AUDIT AT GEORGIAN STATE ELECTRO SYSTEM

Since March 5, 2015 Division of Information Security and Policy of Data Exchange Agency of the Ministry of Justice of Georgia has been auditing IT Department of Georgian State Electro System.

Within the audit, current state of the department is assessed and compared with the best available practices. The process will provide clear understanding for the top-management of Georgian Electro System on the importance of compliance with the requirements of Georgian Law on Information Security, DEA's 27001:2011 standards, COBIT and business continuity practices.

THE NATIONAL BANK OF GEORGIA CERTIFIED AGAINST THE REQUIREMENTS ACCORDING TO INFORMATION SECURITY MANAGEMENT SYSTEM ISO/IEC: 2013

The National Bank of Georgia is the first organization in Georgia which had been certified against the requirements according to the international standard of Information Security Management System ISO/IEC 27001:2013.

The certification conducted in directions of International Payment and Reserve Management Service and Georgian Payment and Security Settlement Service.

The abovementioned fact has declared again that the Information Security Management System of the National Bank of Georgia is in complete accordance with international standard in this direction.

The certification is unequivocal recognition that the measures taken by the National Bank of Georgia in terms of information availability, confidentiality and integrity are implemented in accordance with the ISO/IEC 27001:2013 standards.

The certificate was issued by the certification body of TUV SUD Management Service GmbH which is accredited by the National Accreditation Body (DakKS) of the Federal Republic of Germany.

„ISO/IEC 27001: 2013 is the internationally recognized Standard of Information Security Management System which certificate was issued to the National Bank of Georgia for the first time in the country. The National Bank of Georgia pays significant attention to information availability, confidentiality and integrity. Therefore the compliance with this particular standard is one more step towards the development of the National Bank and the financial sector in whole, - **George Melashvili**, Executive Director of the National Bank of Georgia stated.

NAPR HAS FINISHED THE WORKS ON CONSOLIDATED RESPONSE PORTAL

The IT Department of the National Agency of Public Registry of the Ministry of Justice of Georgia has concluded the development of Consolidated Response Portal, which is designed for the State Property National Agency. With the help of newly established program, the process of communication between the State Property National Agency

and other organizations will entirely be conducted electronically, which in return will ease collaboration and raise productivity.

Till now, the State Property Agency was performing its duties by utilizing traditional means of communication, for instance sending and receiving paper-based correspondence to and from organizations dealing with property alienation or privatization. Such practice often caused notable delays and postponements.

After empowering a new program, all the processes will be switched to e-based operations, which means more automation and flexibility.

The concept of the Consolidated Response Portal was solely worked out and implemented by the IT Department of NAPR.

DEA'S CERT.GOV.GE TEAM CONTINUES PENETRATION TESTING AT VARIOUS ORGANIZATIONS

CERT.GOV.GE team – a subsidiary unit of Data Exchange Agency of the Ministry of Justice of Georgia continues penetration testing on the websites of various public and private organizations. These tests are intended to timely discover and eliminate the weaknesses, which may be found on the websites, making them vulnerable to various cyber-attacks.

Currently, CERT.GOV.GE has signed 5 agreements on performing penetration testing, under which 10 websites have gone the process of detailed monitoring. More websites are set to be checked within the initiative of CERT.GOV.GE.

JUSTDRIVE – INNOVATIVE PROJECT FROM PUBLIC SERVICE HALL

It is now available to pick up processed documents without getting off the car.

At this stage, the service is applied to the following documents:

property statement, business statement, passport, repeated documents, documents affirming absence of objections for weddings,, citizenship and migration related decisions.

Through JUSTdrive It is also available to pick up processed documents about persons registered at the property and original certificate of graduation from school.

ESTONIAN-ITALIAN CONSORTIUM HAS BEEN SELECTED FOR IMPLEMENTATION OF TWINNING PROJECT

EU TWINNING project for strengthening e-governance will be implemented by Estonian-Italian Consortium at Data Exchange Agency of the Ministry of Justice of Georgia. This notice has been released by EU Delegation to Georgia.

The TWINNING project will be launched in September with a duration of 18 months. It should be noted that this will be the second TWINNING for Data Exchange Agency. The first one was implemented by Austrian-German Consortium.

CERT.GOV.GE RECOMMENDATIONS

A critical security vulnerability has been discovered in WordPress' one of the well-known extensions – Google Analytics by Yoast – which makes possible to remotely embed a malware JavaScript code in dashboard without authentication. Once an administrator logs in dashboard, the malware code activates itself and creates possibility of changing administrator's password, adding new users with administrator's privileges etc.

CERT.GOV.GE – Computer Emergency Response Team – a subsidiary unit of Data Exchange Agency of the Ministry of Justice of Georgia recommends an instant update of the above mentioned extension, which is available from dashboard.
